

Progress Presentation Guidelines –2021 – Semester II

- Progress evaluation will be conducted online via teams.
- Each group has to demonstrate the work that you have done within the allocated time
 - Product Demonstration – 40 minutes
 - Q&A – 20 minutes
- Each member should complete **75%** of their assigned function.
 - All the GUIs (Interfaces) should be completed with proper logic.
 - All possible validations should be done.
 - There should be database connectivity for CRUD operations (minimum of three CRUD operations out of Insert, Update, Search and Delete)
 - The system should be integrated (integrate with other member's functions)
- All the members should participate for the demonstration
- Absent members will get zero marks.
- Each member should demonstrate his/her respective function.
- All the groups should be available online, 10 minutes before the allocated time.

Note:

Please note that you will be evaluated (each function) under following aspects in the progress presentation

- Suitability of the GUIs for your application. This includes the content, navigation, user friendliness and interface logic
- Overall completeness of the project
- Completion of CRUD operations
- Appropriate validation

- Database connectivity
- System integration
- Product completion -75% of each function

Submission: Select two main interfaces (screenshots) of your product done by each team member and add to the template given. Submit a pdf of the document to courseweb on the day of the presentation
